

Outdoor Activity Grid

Choose some objects with interesting shapes and arrange them so that their shadow is cast across a sheet of paper. Now draw around the shadows.

I can't wait to see what interesting objects you find.

Here's a fun challenge...can you build a nest using natural materials just like real birds do? NO GLUE OR TAPE ALLOWED!!! This "Make A Birds Nest" STEM project is a fun way to challenge your kids and get them testing out their ideas and problem solving.

Watch this video of a bird building its nest.

Create your own Sky Scanner.

Lie on your back in your garden and look at the sky. Keep still, what do you see? Is the sky moving? What shapes can you see in the clouds?
