

## Windy Friday Home Learning

We didn't expect this did we?

However, we are all very good at Home Learning now so without any further fuss, let me tell you your tasks for the day.

## World Book Day Design a Book Cover

We have included a template if you want to use that but please feel free to design it however you like. It could be for a book you have read, a book you want to read or a book that has not even been written yet. Remember, the illustration needs to hook the reader into the story and the cover should include the title of the book and the author's name.

Here are some examples.

## Maths

We have uploaded an arithmetic paper to the website so have a go at that and then use the mark scheme to find out how you did.

Remember, in class you only get 30 minutes but at home if you need a little longer then, by all means, use it!

## Science

For Science we would like you to design a healthy lifestyles poster. We have learnt all about the heart, what it does and how some things we eat and drink can be bad for it. Use this knowledge and the internet to design a poster showing us all how to live happy and healthy lives.

Here is an example of a good one!
