

Wednesday March 25th Daily News

Good Morning Everybody.

Firstly, can I say thank you to all the people who are coming online, doing the work, joining in with the quizzes and making me smile.

Today, let's start with some exercise as I could see that hardly anyone went on it today. Here is the link for yesterday's workout.

https://www.youtube.com/watch?v=6v-a_dpwhro&app=desktop

or just go on the live one today at 9am.

Today he should have a million viewers!

Send me some photos of you keeping fit so i can Tweet them on the Tweeterscope.

Firstly, English.

You have two options

Option A

Think about our film The Birds.

<https://www.literacyshed.com/for-the-birds.html>

This is a story about a bird who is being bullied by other birds because of how he looks.

Your task:

Today, we would like you to write a persuasive letter to the smaller birds to persuade them to stop.

Think about what you would say to them... How are you going to persuade them to stop?

Think about your main reasons for asking them to stop bullying- that it's not very nice, they should not judge a book by a cover etc

Could you include rhetorical questions, short sentences, emotive language and a range of punctuation?

or Option B

Take the shadow puppet characters you made yesterday and write a play script for them. Make them have an adventure, or a disaster, or a Biscuitman adventure.

Act it out, with help if you have anyone who fancies taking a part and send me a short clip or a photo. Can't wait to see them!!!

Maths

Go to the Showbie page and you will find everything you need.

Science

After yesterday's shadow puppet show. Today have a look at how the shadow is created in a scientific way and draw a picture to show how the shadow is formed. I would like to see some lovely diagrams which you can show me on Showbie.

This lady explains it perfectly!

<https://www.youtube.com/watch?v=xgJdXpN9il4>

Have a really lovely Wednesday and send me messages about what you are enjoying about being at home and doing all this home education stuff!

Here is a quote from Thomas Edison

'I have not failed. I've just found 10,000 ways that won't work.' So remember keep trying new things, especially Scientific activities; you may be a genius one day like Thomas Edison!
