

Wednesday 29th April

kenidjack@alverton.cornwall.sch.uk

Morning all, hope you are all well and managing to get out for your daily exercise.

Quick survey.

Let me know how you get your exercise every day: walking, running, cycling, trampolining. Then we can use that data to make some kind of chart in maths. Let me know today and we can use it tomorrow.

Day Three English Planning

Animal Fact files

Before you can do any writing in today's lesson, you will need to watch an episode of David Attenborough's series - Planet Earth. Here is the link. You may need to get one of your parents to sign into Iplayer, or you may already have it on your tv.

<https://www.bbc.co.uk/iplayer/episode/p048sflc/planet-earth-ii-1-islands>

This episode explores the weird and wonderful creatures that live on islands. It concentrates on some particular ones, the 3-toed pygmy sloth, the albatross, marine iguanas and penguins.

Once you have watched the programme, I want you to design and make a fact file about one of these animals.

There are a couple of examples of what fact files can look like on your Showbie page. It can be done by hand or done on Pages but if you do it on the iPad DO NOT copy and paste from the websites I gave you. Write it in your own words.

Full details on Showbie page.

Maths

You guys are doing so well at the Maths.

So many of you are getting stuck in, asking questions and becoming wonderful mathematicians.

Well done

Today
