Monday 20th April

Contact email - kenidjack@alverton.cornwall.sch.uk

Morning everybody - hope you had a nice weekend.

The weather was a bit colder but I still managed to get out for my hour's bike ride early in the morning. How are you getting your exercise? I would love to know; send me some pictures of you running, trampolining, dancing...whatever you are getting up to to keep your heart pumping.

OK today's learning.

Let's get started with some Joe Wicks again.
Here is the link if you have lost it.

English

From this week, we are going to be doing Word of the Day every day. This is how it works.
Each day I will put a slide onto Showbie containing a Word of the Day.
On the slide you will find a definition of the word and a few tasks you need to do with it.
What I want you to do is to use pencils, paper, felt tips etc to make a sheet each day for the word.
I have put a couple of examples of ones that someone in Year 5 did last week on your Showbie page.

Upload your work to the Showbie Word of the Week page.

Next ,I have provided a short reading comprehension based on the Hobbit for you to do.

I will post the answers on Showbie later.

Finally , for English I want you to go on Read Theory for 20mins.
If you have forgotten your password, just message me.

Maths

You know the score, Do It now, video, questions answers.

I am so impressed with the numbers of you cracking on with this maths work. You are all stars.

Afternoon work - Coding

This afternoon, we are going to try some coding.

This will all be done on a website so you should be able to access it whatever you are on.

The activity is called Dance Party and has 12 different stages to work through.

It starts off very simply but by the end you can create something really fab.

Each section starts off with a video to watch then an activity to try. If you get stuck, click on the lightbulb.

It will let you know when you have finished that level.

When you are finished, send me some screen shots (or videos if you are on the ipad) so I can see how you have done.

On your Showbie page, I have included a help video to show you how to screen record your final results!

Let me know if you have any problems but the most important thing is to read the instructions on the screen.

Follow this link to get started.
